

Opening Range Breakout Strategy

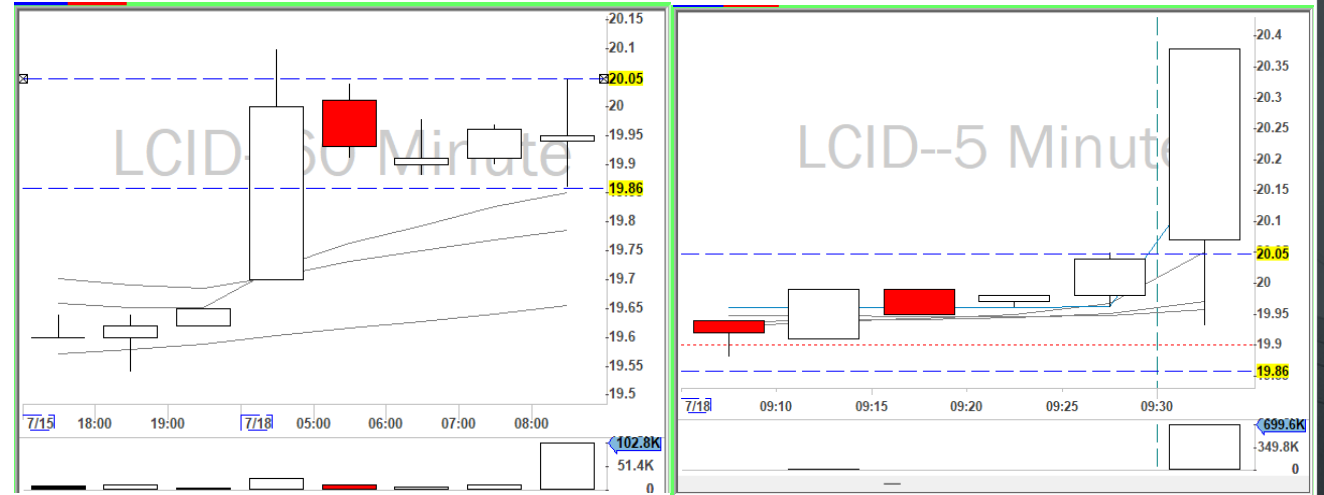

Stock Selection

- I have my own list of stocks
- Avoid trading stocks with catalyst
- Need to see a clear level on the 60-m chart

Setup Identification

- Range on the 60-m chart
- Range on the 5-m chart (At least 4 candles)
- Preferably fake breakdown to the opposite side of the move

Trade Execution

- Confirmation candle /candlestick pattern on the 1-, 5-m chart
 - Hammer
 - Bullish/bearish engulfing candles
 - Any bullish candle
- Entry at the break, or at the turning point

Consideration Notes

- Target should be at least 2R
- Make sure there are no strong levels before the 2R target
- Make sure not to play against a candlestick pattern
- Remember that 60m breakouts aren't intended to be trend trades
