

Mountain Pass Strategy

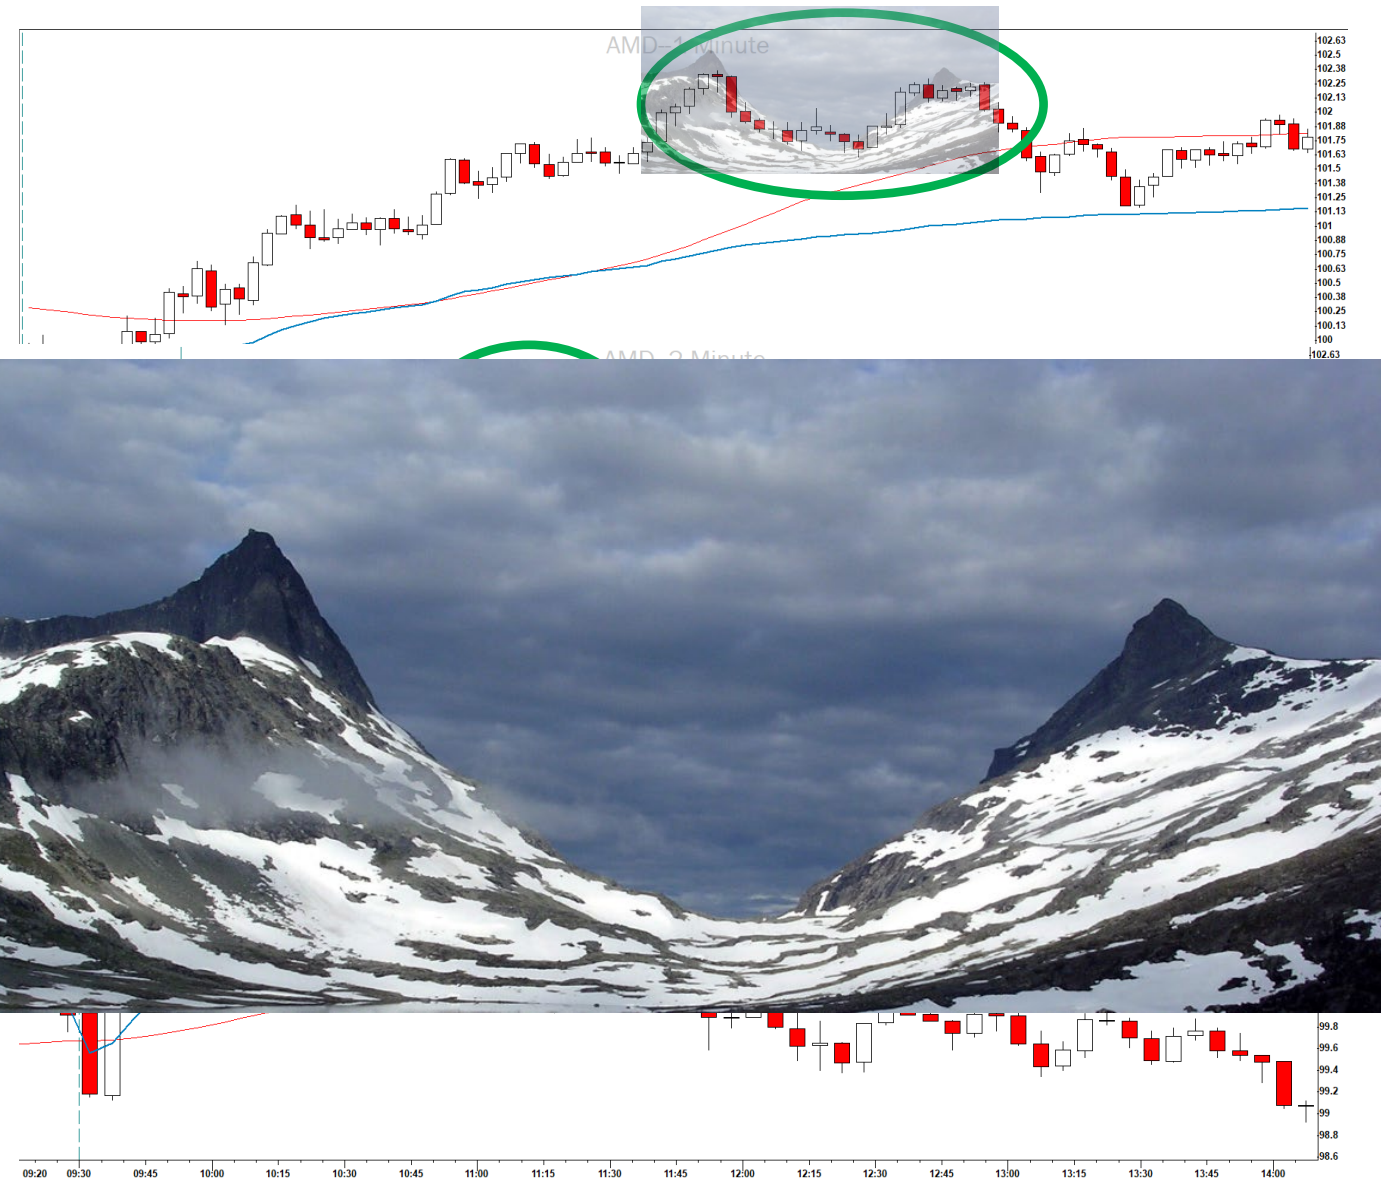

TRADING TERMINAL.COM

Presented by: Peter Donnelly

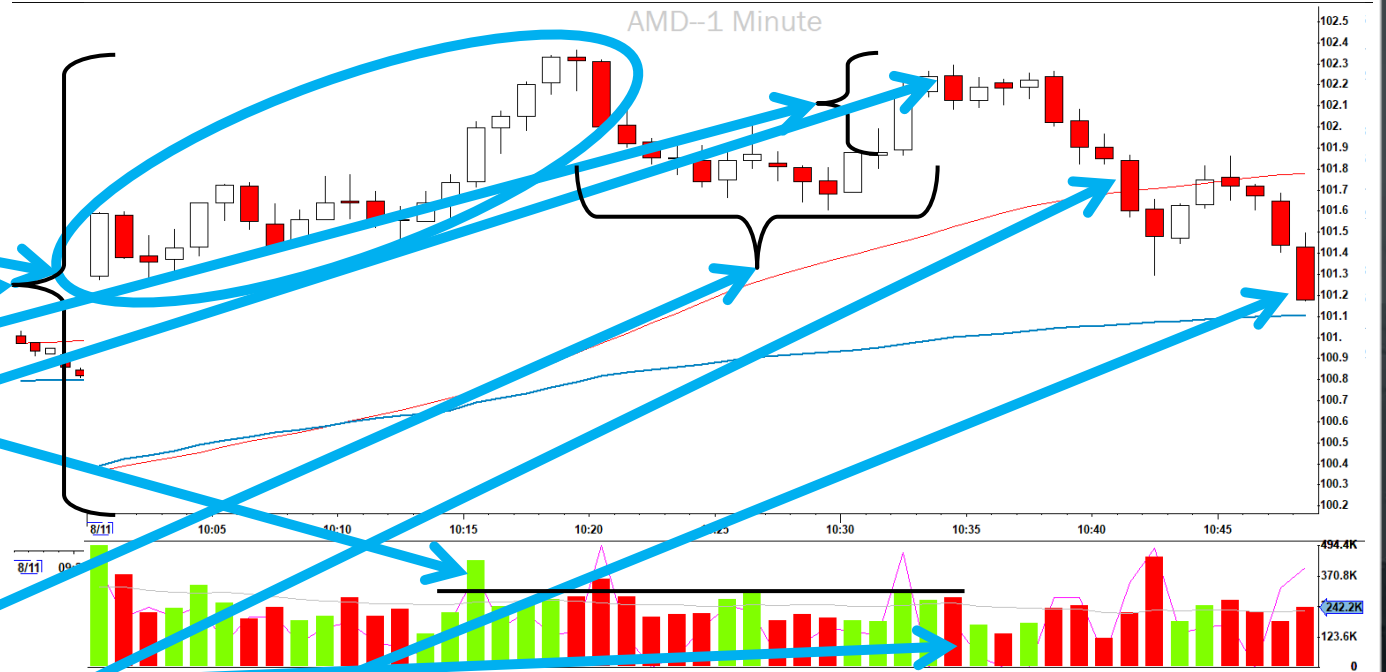

Stock Selection

- Works best with mid- to large float stocks
- Stock should be trading with strong volume
- Must have a new high or low of the day

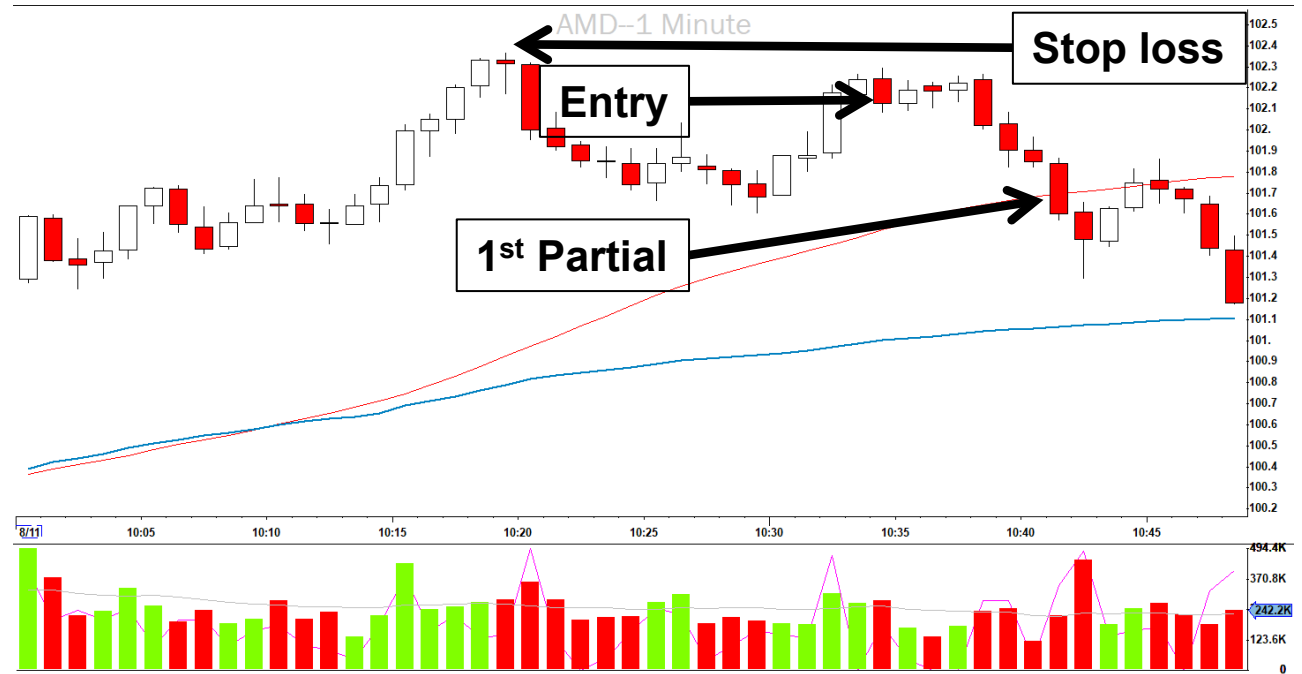

Setup Identification

1. Strong trend to new high of day
2. Final push on exhausting volume
3. Pullback 20-50% of initial move
4. 2nd top which cannot break the high
5. 2nd top in 5-20 time periods
6. Drop on increased volume
7. Big drop at 50 SMA cross
8. Drop to VWAP and beyond

Trade Execution

- Entry should be on the 1st reversal candle after HOD retest failure
- The Stop Loss is just above the HOD
- I will not partial until the 50MA cross OR I've achieved 2x my initial risk
- Always obey your stop

Consideration Notes

- This can be played long or short
- Any intraday timeframe works
- Set-ups occur from 9:50am – 3:20pm
- Trades will last 5min – 5+ hours

AMD-1 Minute
