

Strategy: ABCD Pattern

Stock Selection

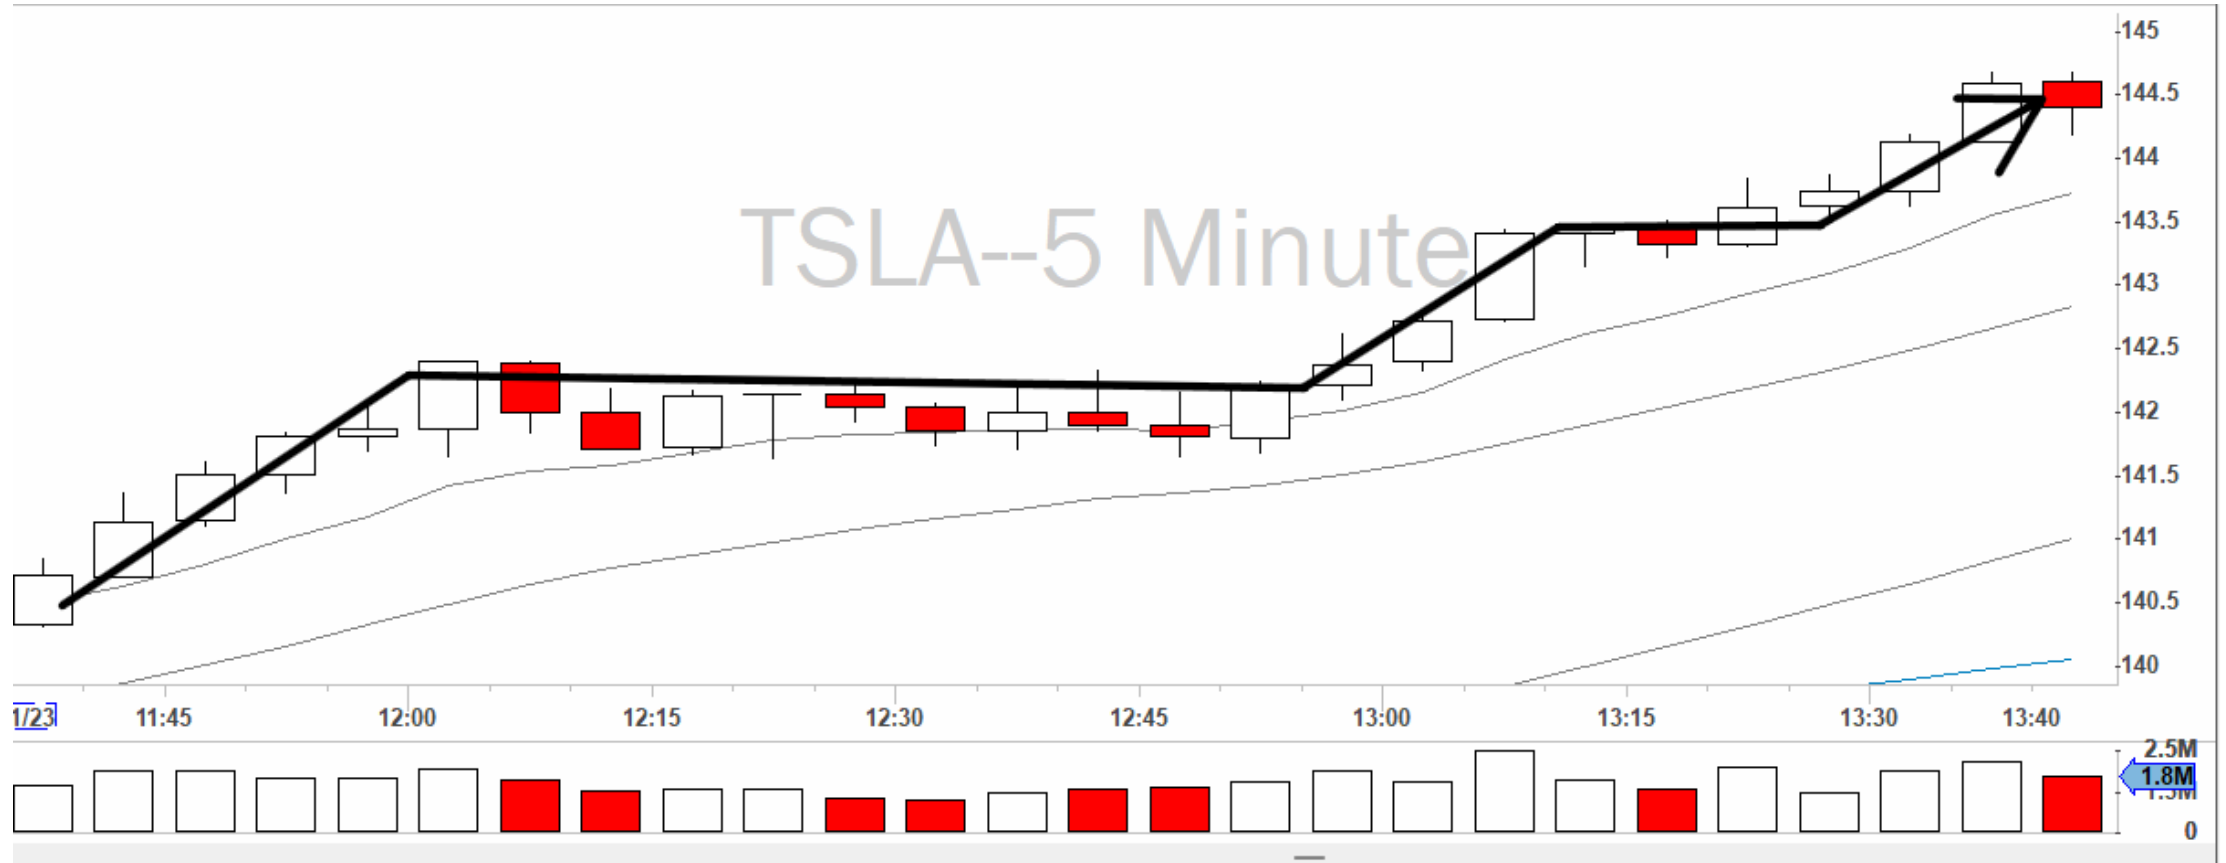

Stock Selection

- 1) The daily chart should support the intraday direction
- 2) The 60-minute chart should support the direction of the trend.
- 3) Intraday trend should be visible
- 4) There should be a pullback to a level/ moving average
- 5) The pullback should be at least 50-70%, if there trend is so strong, 30-50% could be enough, but not less

Setup Identification

- 1) ABCD Pattern type A
- 2) ABCD pattern type B
- 3) ABCD pattern type C

ABCD Pattern type A

ABCD Pattern type B

ABCD Pattern type C

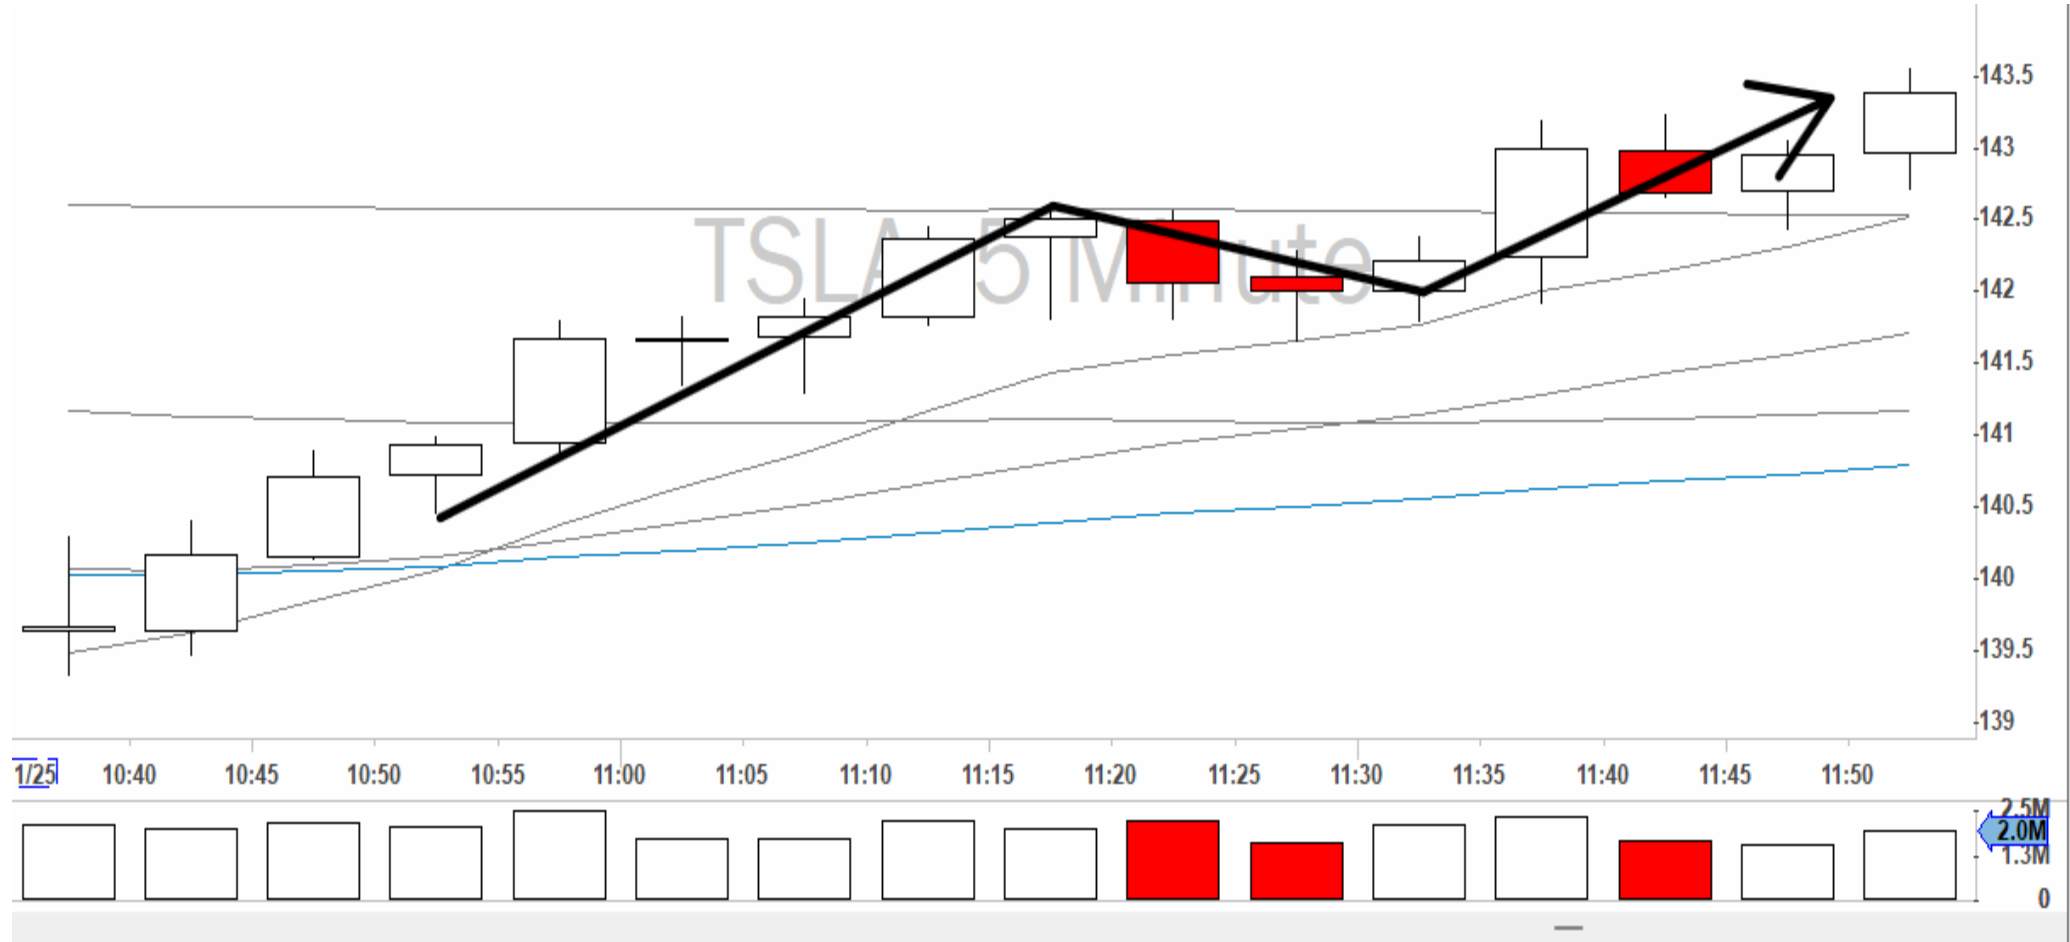

Trade Execution

- 1) ABCD Pattern type A
- 2) ABCD pattern type B
- 3) ABCD pattern type C

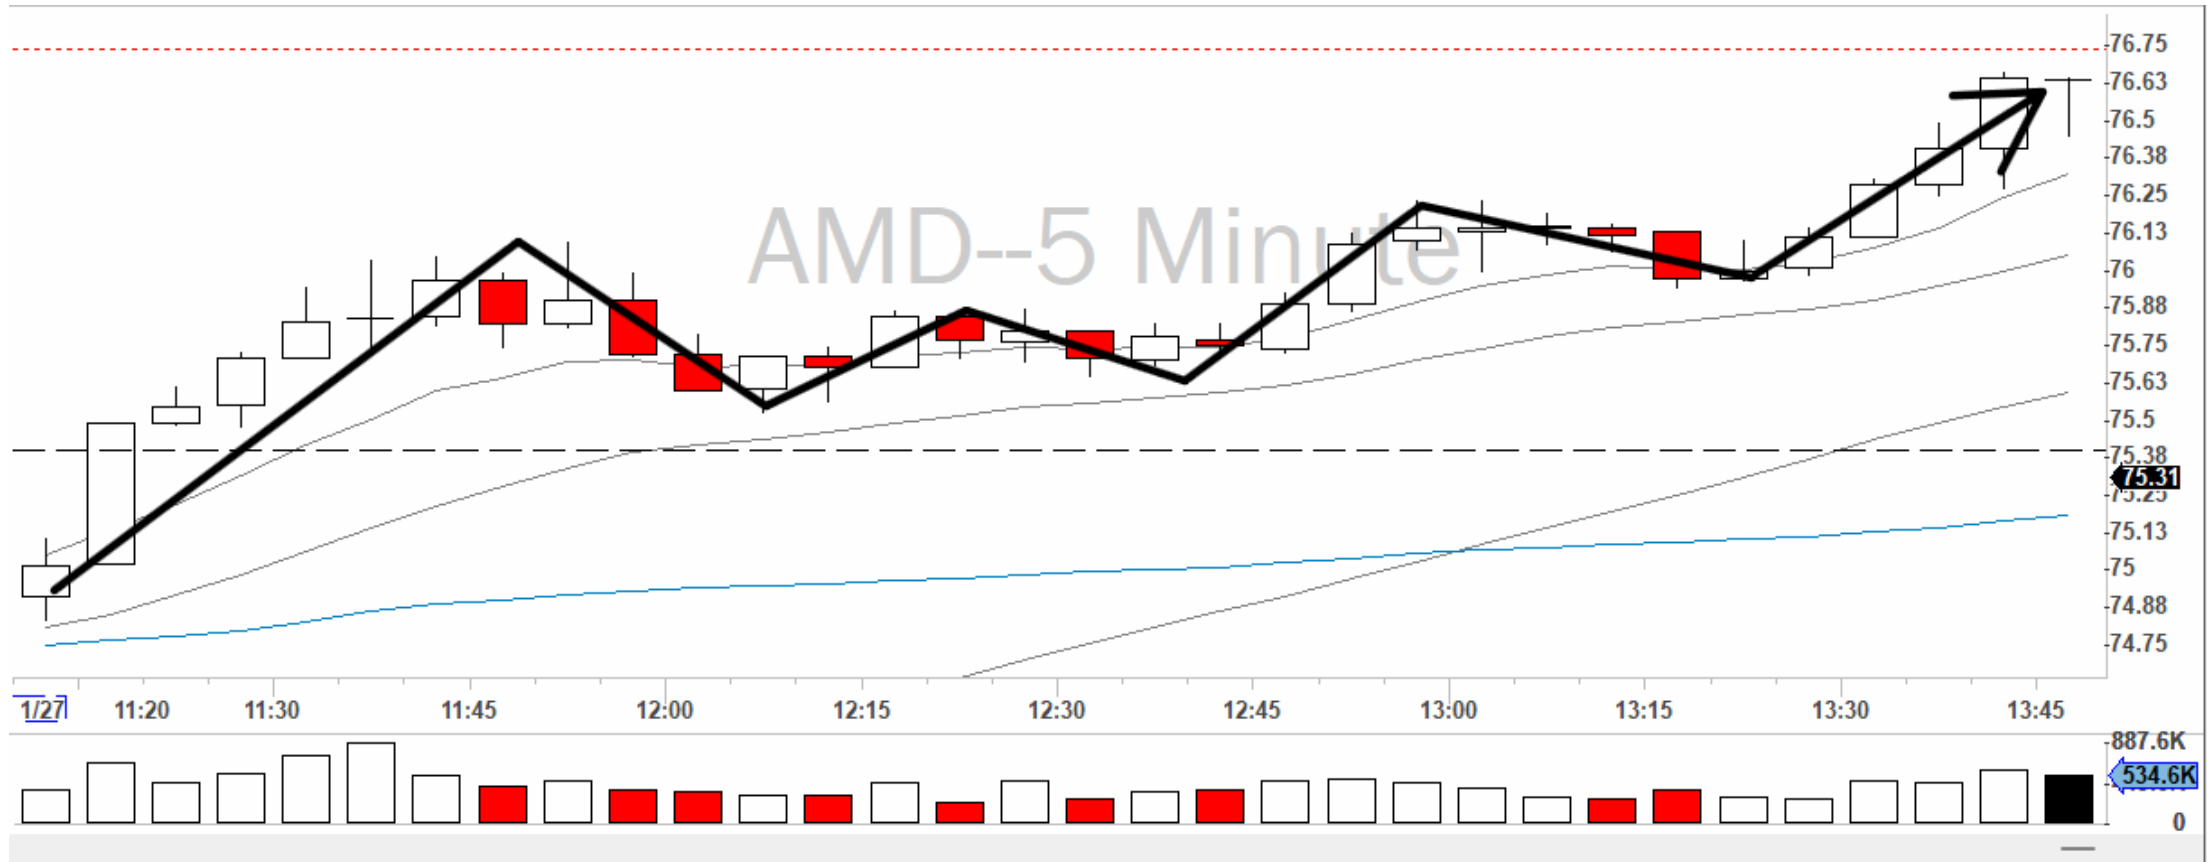

ABCD Pattern type A

ABCD Pattern type B

ABCD Pattern type C

Consideration Notes

- Make sure the profit target is at least 2R
- Partial at key levels**
- Make sure to bail if the ATR is hit**
