

# How to Trade Trends

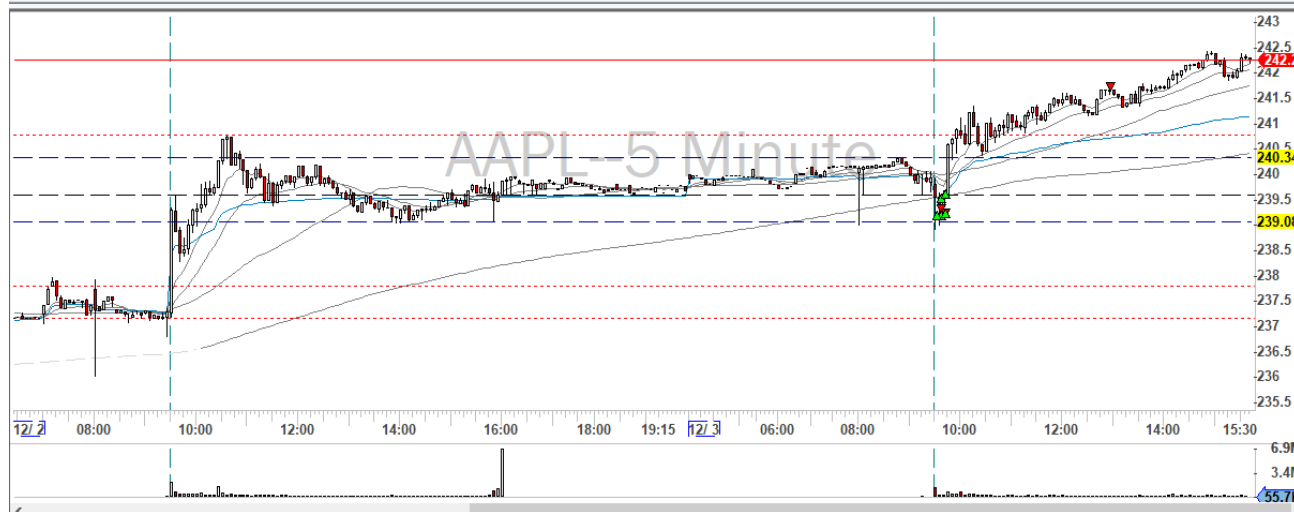

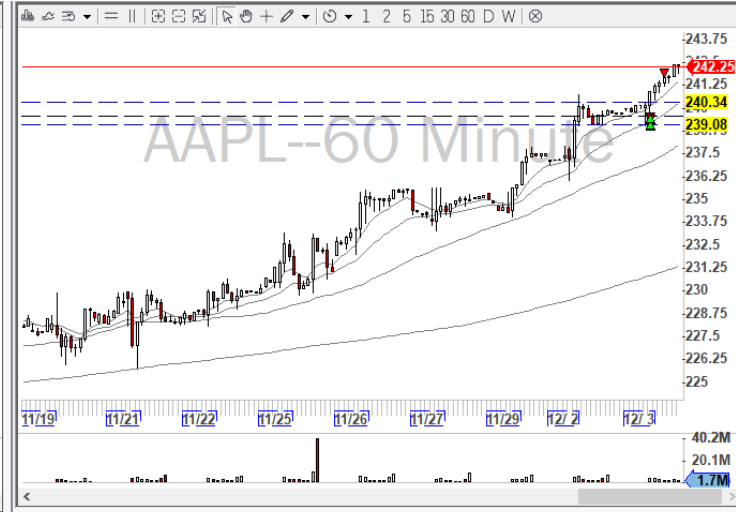

# Stock Selection

- **Favorite List of Stocks**

# Setup Identification

- The stock should be in the advancing or declining phase
- Preferably during the first couple days after the trend begins
- Look for a range or compression on the 60-minute chart

# Setup Identification

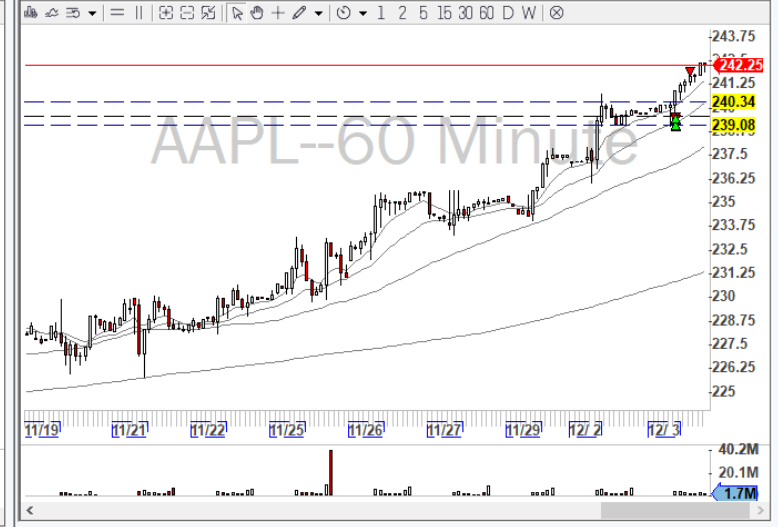

# Trade Execution

- **Entry as soon as the breakout happens/Closer to the levels of support**
- **Add during the first pullback**
- **Target 80-100% of the ATR**

# Trade Execution

15:41:11

# Consideration Notes

- Target should be at least 3R
- Make sure **NOT** to move the stop loss to the breakout level
- **ALWAYS** consider the ATR
